

The reason why I love Camp Hendon so much
by Leland W.

Last year was my first year at Camp Hendon, I was very excited and scared. My Mimi was very nervous for me to be away from home and her. She cried all the way to camp. I was excited because I never been away from home, I was scared at first but then I seen other kids just like me. When I went to camp I could not give myself shots. I learned a whole lot from camp and I made lots of friends. I was not scared and I even helped a boy who was crying mess, his mom and dad. When mimi picked me up she cried because I could give myself shots and even did belly shots that I learned at camp hendon. I can't wait to go back this year to learn more. I was diagnosed with diabetes when I was 5. My mimi tells me be thankful everyday because there is kids worst than me. I wish I could tell them it will be ok. Camp Hendon helped me.

Thank you,
